Re: Tonolli Corporation Superfund Site
Update on Removal Activity

Dear Kate:

As per our discussion on November 1, 1989, I have enclosed copies of several documents regarding EPA's Removal activities to bring you up to date. This information is provided via coordination with Rich Fetzer, EPA's On-Scene Coordinator assigned to Tonolli. Thus, any detailed questions pertaining to on-site activities should be directed to him at (215) 597-9328.

As always it was a pleasure to speak with you and to exchange concerns regarding the Tonolli Site. Both Rich Fetzer and myself have attempted to update and coordinate with PADER via contact with Bob Lewis of your staff. However, it appears that his present work load is quite cumbersome. Please let me know whether a new state contact has been or will be assigned, or whether you prefer me to update you directly on site-related matters. As you are aware, an RI/FS Work Plan for Tonolli is due to be delivered to EPA in early January 1990. I would very much appreciate the state's input on scoping out the RI/FS for Tonolli, and hope that your office can participate as a member of the peer review team. Please let me know your recommendations on this matter.

Once again, thanks for the opportunity to discuss the site, and the pending cogeneration facility. I appreciate the direction to the proper contacts within PADER for coordination on that matter. I've enclosed some "public concern" information from the state's public hearing for your reference. Due to the

AR500037A

concerns raised at this hearing, EPA's OSC is planning to conduct a public meeting in the near future. This meeting is tentatively scheduled for November 20, 1989, and will be held at the Recreation Center in Nesquehoning. Please feel free to contact me at (215) 597-1101 if you should require additional information, or wish to notify us that PADER will be represented at the public meeting.

Sincerely,

Donna M. McCartney
